

# Vacuum Chambers

OEM Vacuum Chamber and High-Level Chamber Assembly Production

## About Us

Keller Technology Corporation (KTC) is a precision fabrication and manufacturing specialist, providing OEM contract manufacturing services for vacuum chambers operating in the high vacuum and ultra-high vacuum regimes. Keller has extensive experience fabricating large form factor chambers with complex geometries out of aluminum, stainless steel and plated steel. KTC is also able to provide value-added services to deliver fully-integrated vacuum systems manufactured to your demanding specifications.

## Expertise

- ▶ Serial Production of Chambers
- ▶ Large Form Factor Chambers
- ▶ High-Complexity Chambers
- ▶ Value-added Integration
- ▶ Large Envelope 5-axis machining
- ▶ Stainless Steel, Aluminum, and Plated Steel

## Scope of Services

Machining

Welding | Fabrication

Polishing & Seal Surface Prep

Cleaning | Bakeout

Leak Test | RGA

Clean Room Assembly

Systems Integration

Testing & FAT

Preparation for Shipping

## Markets Served

Semiconductor Equipment

Materials Research

Deposition

FEL & Synchrotron Light Sources

Particle Accelerator Facilities

Fusion Energy

Laser Research

University Research Facilities

Space & Aerospace
